

PROPOSAL · HOTEL OPERATIONS SOFTWARE

Hotel Management System

Front desk · Rooms · Payments · NFC key cards · Shifts · SMS · Guest chat · Housekeeping

Prepared for: [Client Name / Hotel]

Prepared by: [Your Company / Developer Name]

Date: August 2026

Live demo: <https://kate-hotel.vercel.app>

Login credentials are supplied on a separate sheet.

1. Executive Summary

This proposal outlines a complete, cloud-hosted Hotel Management System designed to run your front desk, housekeeping, and guest communications from one simple platform. The system has been built, deployed, and is live today — ready for a pilot with your staff.

Every team member gets a tailored view: reception staff check guests in and out, cleaners receive and complete housekeeping tasks, managers see payments, shifts and reports, and guests get their own portal with direct chat to the front desk. No paper registers, no loose spreadsheets, no missed follow-ups.

2. What Problem Does It Solve?

- **Check-in chaos** — Guests are registered in seconds with a room, an NFC key card and payment in one flow.
- **Unpaid guests slip away** — Every unpaid bill is tracked and listed for follow-up; shift reports surface them automatically.
- **Shift handover gaps** — End-of-shift reports are generated automatically as a PDF with all check-ins, payments collected and unpaid guests.
- **Silent guests** — Guests chat with the front desk from their own portal, and staff relay messages between roles.
- **No visibility for management** — Admin gets live dashboards, audit logs and notifications for every important event.

3. Who Uses It?

Role	Access
Super Admin	Everything, incl. staff & cards
Admin	Management & oversight
Reception	Check-ins, payments, shifts
Cleaner	Housekeeping tasks
Guest	Portal, chat with front desk

4. Modules & Features

- **Front Desk & Check-in** — Room availability view, guest registration, NFC key card assignment, deposit or full payment, and automatic room status updates.
- **Check-out** — Close stays, trigger room cleaning status, and log the transaction.
- **Rooms** — Manage room numbers, floors, types and rates; statuses: Available, Occupied, Cleaning, Maintenance.
- **NFC Key Cards** — Issue, assign to a room, and revoke physical cards — tied to the guest stay.
- **Payments** — Record cash/card/mobile payments, mark paid or unpaid, and follow up on balances.
- **Shift Management** — Start/end shifts; each end automatically generates a PDF shift report (check-ins, money collected, unpaid guests) sent to Admin.
- **SMS Notifications** — Guests automatically receive a welcome SMS with their room number and WiFi credentials (Africa's Talking gateway).
- **Guest Portal & Chat** — Guests log in, start a conversation with the front desk, and staff relay replies — with unread indicators and live updates.
- **Housekeeping** — Assign cleaning tasks to cleaners, track status, and return rooms to Available when finished.
- **Management & Security** — Role-based access, audit trail of every action, staff management, notifications, and reporting.

5. Technology & Reliability

- **Modern web app** — Runs in any browser on desktop, tablet or phone — no installation.
- **Cloud database** — Managed PostgreSQL with automated backups and encryption at rest and in transit.
- **Fast & secure** — Hosted on a global CDN with HTTPS everywhere; passwords are hashed, sessions are secured.
- **Scalable** — Handles growth from a single property to larger operations without rework.

Note: SMS delivery uses the Africa's Talking service; provider message rates apply separately.

6. Deployment & Support

- **Hosted for you** — We host and maintain the system; no servers or IT staff required on your side.
- **Onboarding** — Demo accounts, staff training, and a walkthrough of check-in, payments and shifts.
- **Branding** — Your hotel name, WiFi SSID and password are configured in the system.
- **Support** — Ongoing assistance, monitoring and data backups included.

7. Investment

Item	Description	Amount
Setup & customization	Install, branding, training	[TBD]
Monthly hosting & support	Cloud hosting, backups, support	[TBD]
SMS (usage-based)	Billed at provider rate	At cost

Pricing is flexible and can be tailored to the hotel's size and needs — happy to discuss a fixed or monthly model.

8. Suggested Timeline

Phase	Activity	Duration
Demo & sign-off	Live demo with this proposal	1–2 days
Customization	Branding, rates, rooms set-up	3–5 days
Training	Staff onboarding sessions	1–2 days
Go-live	Switch-on + support	Day 1

9. Next Steps

- **Try the live demo** — Use the login sheet provided with this proposal.
- **Confirm branding** — Hotel name, WiFi details and room rates.
- **Agree investment** — Finalize setup and monthly pricing.
- **Schedule onboarding** — We train your team and go live.
